DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 21-28, drawn to a liquid cooled modular electronic system, classified in class 361, subclass 699.
- II. Claims 29-32, drawn to a method for cooling an electronic module, classified in class 29, subclass 830+.
- III. Claims 1-14, drawn to an electronic system, classified in class 174, subclass 252.
- IV. Claims 15-20 and 33, drawn to a liquid cooling module apparatus, classified in class 165, subclass 80.4.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, III, IV and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the cooling liquid need not be received into the sealed electronics module instead it can be wrapped around the electronic module housing and dissipate heat away from the housing thus cooling the air inside the module housing and cooling the electronic components.

Art Unit: 2841

Inventions I and III, IV are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because (regarding group III) the modules need not be sealed against noise, airborne contaminants, nuclear, biological and chemical agents for functionality, and (regarding group IV) the heat can be dissipated from the liquid cooling module in a variety of different ways such as through metal conduction and not through conditioned air or conditioned liquid. The subcombination has separate utility such as operating individually cooling individual electronic systems without the need for connections to a second liquid cooled modules or the need for redundant systems.

Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as cooling electronic systems that are non-computer systems such as cooling the components of a remote control car or audio speaker. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2841

Because these inventions are distinct for the reasons given above and the search required for any individual group (I, II, III, IV) is not required for any other group (I, II, III, IV) restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ivan H. Carpio whose telephone number is 571-272-8396. The examiner can normally be reached on M-R 6:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kammie Cuneo can be reached on 571-272-1957. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
